## e-Cargoware's Security Dashboard is a Game Changing solution for GTA Dnata Cargo Operation

### SOLUTION OVERVIEW

GTA Dnata required a solution to manage and monitor the security compliance of export shipments accepted at terminals, a crucial function in their daily operation. Cargoware's Security dashboard is a cutting edge solution, built on the nG (next generation) platform with attractive User interface for security personnel to easily visualize and perform tasks. This has real time data visibility over other integrated modules allowing updates to status & location which makes it easier for any end user.

Specially designed for security personnel to monitor and update Screening status on an individual shipment or a Pre build ULD, as well as input how it was screened.

With the nG(new generation) platform it provides a clear and attractive look and feel, with color-coded options to easily navigate and check status of shipment & ULD in a single page. Real-time awb status is automatically updated in screen.

# Client Overview

GTA dnata provides ramp, passenger and cargo handling services to 17 airlines in Toronto. The company's customer-oriented team assisted 1.2 million passengers and moved over 90,000 tons of cargo in 2019. GTA dnata will further expand its footprint in Canada by launching operations at Vancouver International Airport (YVR) in early 2021.

dnata entered the Canadian aviation market by establishing GTA dnata through the acquisition of a 50% stake in GTA Aviation's cargo and ground handling operations at YYZ in 2016. Since January 2020, dnata also offers quality catering services at Vancouver International Airport.

01 Automate alert with color code for shipment missing SLA from screening

02 Shipment with security status as Complete, delay, Fail/reject or pending

03 Ability to update various security primary & secondly screening methods

04 Able to update Pass or Fail the shipment post screening

05 Able to check and view when shipment has tendered at terminal

## KEY FEATURES

06

Able to view when screening has been complete

07

Download into PDF and Excel

08

Realtime Location Monitoring

09

Print e-CSD

“

The Security Dashboard introduced by e-CARGOWARE along with new Docs Acceptance has significantly streamlined and digitised our acceptance process. Shortly we will be rolling out e-Cargoware mobile apps. In general I have found the system is easy to use and the team are pro-active and responsive to our needs.

”
